4. Active.com account vs After3 Online Account:

Active.com is a place to create an account profile with our Registration host. However, it does not create an Online Account in our database until you register with After3. By creating a profile account with Active.com, this allows you to login to your account during registration and prefill some of your account information rather than creating a new account. If you have created an account with Active.com, you can enter that email address in Step #1 and then enter the password. Once this happens, your address and parent information will already be included on the registration form. After registration has been completed, you will receive an Online Account invite from After3 as you have now created an account with our database.

If you have not created an account yet with Active.com, you are able to enter your email here and continue to Step #2. At the end of registration, it will ask you to create an account which will then create a profile on Active.com and also an Online Account with After3.
